STANFORD GOLF 1979

STANFORD UNIVERSITY

Since its founding by Leland and Jane Stanford as a memorial to their only child, Leland Stanford Junior University has emerged as one of the foremost academic institutions in the world. Organized in 1891, the University covers some 8,200 acres from the plain of the Santa Clara Valley into the foothills of the Santa Cruz Mountains, beyond which lies the Pacific Ocean.

Annually, Stanford enrolls approximately 11,700 students, of whom 6,500 are undergraduates, and 5,200 are graduates. The University uses no racial, religious, ethnic, geographical or sex-related quotas in admissions. About 48 percent of the students are from California, and the rest from the other 49 states and some 70 countries. Black, Chicano and native American students comprise about 10 percent of the enrollment.

The university is organized into seven Schools: Earth Sciences, Education, Engineering, Graduate School of Business, Humanities and Sciences, Medicine and Law. Within the Schools, there are 70 departments. In addition, there are 27 centers, 12 institutes, eight laboratories and 16 specialized programs outside the school structure. Some of the major ones are the Hoover Institution on War, Revolution and Peace, the Food Research Institute, the Center for Research in International Studies, the W.W. Hansen Laboratories of Physics, and the Stanford Linear Accelerator Center.

Since 1957, Stanford has moved from thirteenth to third in the overall excellence of its graduate programs in humanities, sciences and engineering, according to surveys of the American Council on Education. Last year, the Graduate School of Business was rated first in the nation, as was the Graduate School of Education. Both the Engineering and Medical Schools were ranked second nationally while the Law School was rated third in surveys by deans of the respective schools.

A measure of undergraduate distinction is found in the increase in applicants, now running at about seven applicants for each place in the freshman class. Forty-four Stanford students have been elected Rhodes Scholars since World War II. Nearly eighty percent of graduating seniors attend graduate or professional schools.

About 46 percent of Stanford's undergraduates receive scholarship aid totalling \$9.4 million a year, while almost all of the graduates receive fellowship support valued at \$23 million a year.

Dr. Richard W. Lyman became the seventh President of Stanford in September of 1970 following service as Associate Dean of the School of Humanities and Sciences from 1964 to 1967 and as Vice Provost from 1967 to 1970. He holds the Bachelor of Arts Degree from Swarthmore and the degrees of Master of Arts and Doctor of Philosophy from Harvard. A specialist in contemporary British history, he joined the Stanford faculty in history in 1958.

Among the approximately 1100 faculty members who make up the Stanford Academic Council, there are eight Nobel laureates, three Pulitzer Prize winners, 62 members of the

National Academy of Sciences, 95 members of the Academy of Arts and Sciences, 24 members of the National Academy of Engineering, seven members of the National Academy of Education and 10 National Medal of Science winners.

A special feature of the Stanford undergraduate education is the opportunity to attend a Stanford overseas study center. These centers enable the students to study abroad while continuing normal progress toward an undergraduate degree. The five Stanford overseas centers are located in England, France, Germany, Austria and Italy. Programs for advanced students conducted with other universities are in Paris, Salamanca (Spain) and Bonn. Yet another program available, located in Rome, is the Intercollegiate Center for Classical Studies. In 1977-78, approximately 600 students spent one, two or three quarters at one of the studies centers.
